

Fujifilm Finepix S1000fd Leather Grip Replacement

An easy to follow repair guide for replacing the Fujifilm Finepix S1000fd's leather grip.

Written By: Lizzie Eller

INTRODUCTION

Use caution when carrying through with procedure, there are components involved than can pinch you when taking it apart.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
 - [Tri-point Y0 Screwdriver](#) (1)
 - [Metal Spudger](#) (1)
-

Step 1 — Rear Cover Casing

- Use the Phillips PH00 screwdriver to remove all the 0.5mm screws on the side.

Step 2

- Use the Tri-point Y0 screwdriver to remove the two 0.5mm screws on the horizontal axis.
- Remove the other two 0.5mm screws on the bottom with the PH00 screwdriver.

Step 3

- Once you unscrew all of the screws, carefully remove the rear casing.

⚠ Be careful not to pull the rear casing, otherwise you will rip the ribbon cable.

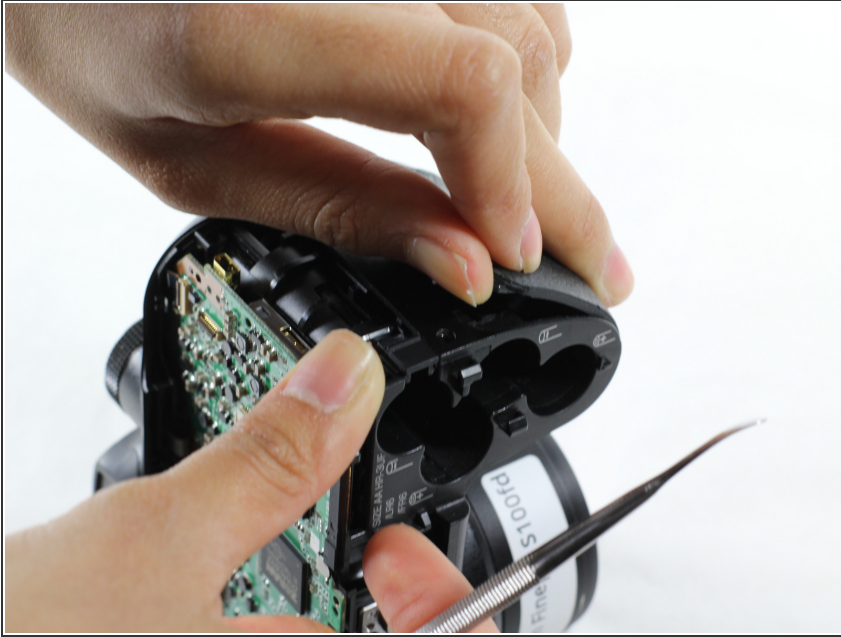

- Detach the ribbon cable by lifting the tab on the connector.

Step 4 — Leather Grip

- Using the metal spudger, place it in between the leather grip and the black plastic compartment

Step 5

- Repeat Step 4 for the other side
- Remove the leather grip

To reassemble your device, follow these instructions in reverse order.
